

## About Us

CRYSTAL CLEAR is a Disabled Veteran-Owned, (a) Certified, HUB Zone Certified, SDB Certified firm with greater than 3 years experience in contracting. We specialize in forest restoration, thinning, logging, fire rehabilitation, GIS, and noxious weed control. Other specialties include desert cleanup and restoration, fencing, natural disaster management, cleanup, and rehabilitation, as well as storm cleanup.

At CRYSTAL CLEAR, we are committed to providing the very best in land management services. We are proud to work with various Government entities as well as private land owners to ensure a balanced approach to land management.

# Solutions for most any situation

**Hand Crews:** Hand crews can be used for a variety of treatment types depending on the situation and desired results. Forest treatments including lop and scatter, cut and pile, cut and grind, hazardous tree falling, and tree planting can be done with hand crews while causing very little disturbance to the surrounding environment.

**Mechanical Treatments:** Light, medium, and heavy equipment can be used to achieve a wide variety of treatments with various site conditions such as forests, riparian areas, sensitive habitat, and many other environments. We have many different attachments or "heads" and offer such things as forest thinning, logging, mastication, extraction, and more.

**Noxious and Invasive Weed Control:** Through the use of herbicide application, hand crews, and mechanical control, we provide an efficient and effective option when it comes to controlling exotic species. Currently certified for pesticide application in 13 states, we offer spot applications and broadcast applications on such things as Cheatgrass, Saltcedar, Russian Knapweed, Tall Whitetop, Hoary Cress, Scotch Thistle, Leafy Spurge, and more.

**Mapping and Inventory:** Through the use of ArcGIS and GPS receivers, we offer a variety of options when it comes to mapping and data collection ranging from vegetation inventory to data base creation to treatment maps and more. We actively use GIS and GPS receivers for navigation and perimeter delineation on our projects to ensure accuracy and treatment of only the desired areas.

**Other:** Other specialties include storm cleanup, natural disaster management, desert cleanup, restoration, plant salvage, fencing, boardwalk design, construction and more. We are very versatile when it comes to the not so common projects and we will work with you to meet your objectives in a manner that is light on the land.

At **CRYSTAL CLEAR**, we take pride in doing the job right in an efficient manner to get you exactly what you are looking for. We are very flexible and believe strongly in adaptive management. Whether it's just one phase of a project, or all phases of a project, we will work with you to achieve your goals from start to finish.

**CRYSTAL CLEAR**  
MAINTENANCE INC.

We encourage you to call and/or meet with us during the planning phases of your projects to discuss what your best options are and what it might take to complete the job. For more, visit:
